

Manufacturing Chemists since 1908

SUMMARY OF THE UNITED STATES FDA REGULATIONS REGARDING THE USE OF MORETEX "MOPOLY" AND "LOMO" POLYETHYLENES.

This guide is intended to serve as a reference to the United States Food and Drug Administration Food Additive Regulations applicable to the use of Moretex Polyethylene as components in food and food packaging materials.

The information below is only a guide and the user should refer to specific FDA regulation details including extraction limitations and restrictions on the use of these products.

Mopoly (acid value 18 and higher)

21 CFR 175.105 - Adhesives

21 CFR 176.180 - Components of paper and paperboard in contact with dry food

21 CFR 176.200 - Defoaming agents used in coatings

21 CFR 176.210 - Defoaming agents used in the manufacture of paper and paperboard

21 CFR 177.2800 - Textile and textile fibers

LoMo and Mopoly (acid value 17 and below)

21 CFR 175.105 - Adhesives

21 CFR 175.125 - Pressure sensitive adhesives

21 CFR 175.300 - Resinous and polymeric coatings

21 CFR 175.320 - Resinous and polymeric coatings for polyolefin films

21 CFR 176.170 - Components of paper and paperboard in contact with aqueous and fatty foods

PO Box 1799 Spartanburg, South Carolina 29304
